FOUNDER'S MESSAGE

The Future Belongs to Autonomous Enterprises

"

In 2013, we saw a need: smart systems weren't accessible to everyone. We started by empowering people with key skills, connecting companies with the right resources, and streamlining processes for both private and government sectors through ERP solutions. This led us to create our BI development vertical. Now, as we step into the age of AI, we're building cutting-edge products designed to make digital transformation affordable and less complicated for businesses of all sizes. We're here to help you take those digital steps with confidence, one step at a time.

"

~Soumojit Das, Founder, MD

MISSION & VISION

Mission: To architect self-evolving IT solutions that dissolve operational constraints and amplify human potential.

Vision: Why the World Needs Autonomous Enterprises ?

By 2030, businesses that rely on human-led processes will be obsolete. InTime's Agentic AI doesn't just automate tasks—it learns, predicts, and acts. Here's how we're different:"

Vision 2030 – Towards the Autonomous Enterprise
We envision a world where businesses run on intelligent agents, not instructions.

Our Vision 2030 lays the path:
2025: Launch NeuraCore, ExecuCore AI systems.
2026: Automate 20%+ of client operations using Agentic AI.
2028: Introduce predictive autonomous workflows.
2030: Build digital enterprise model which will automate 60% of client opration.

How We Get There ? Proprietary AI algorithms, strategic partnerships, and 10+ years of ERP/BI expertise.

"Without intelligent automation, businesses risk falling behind.
InTime ensures you stay ahead."

The Future of IT-Delivered InTime

Autonomous Enterprise Framework
Our Proprietary Path to Business Autonomy

Assess: Comprehensive diagnosis of current business processes and automation potential

Augment: Implementation of NeuraCore agents to enhance human capabilities

Anticipate: Deployment of predictive models that optimize operations before issues arise

Autonomy: Achievement of self-managing business units with human strategic oversight

Automate: Systematic replacement of manual processes with ExecuCore autonomous functions

ERP Consulting - SAP Experts

SAP Transformation:
From Legacy Systems to Intelligent Operations

Our Approach
We don't just implement SAP—we transform it into an intelligent platform through our proprietary enhancement methodology.

Technical Excellence: Implementation, Project Recovery, Migration, Version Upgradation, Advance Module Implementation, Audit and support for both ECC, S/4HANA, Rise & Grow with SAP.

AI Enhancement: Integration of Agents to automate complex SAP workflows.

Intelligent Reporting: Real-time BI dashboards with predictive analytics.

Continuous Optimization: Proactive system tuning and process refinement.

Training and Development: Pre-project preparation training, skill enhancement training. "Upskilled 200+ consultants since 2016."

SAP on Autopilot

FinanceBot: Reduced a Group of Company's month-end close from 12 days to 3 days.

InvoiceBuddy: Automated 70% of manual invoicing for a FMGC client.

Hyper automation: Automate order-to-cash in SAP for a Garments Manufacturing company savings millions in a year.

Engagement Options

Foundation	Advanced	Transformation	Custom
50/100/200 hours monthly SAP All Module support Packages.	Comprehensive support + Automation + BI Reporting.	Full-stack automation + Agentic AI+ Custom and Predictive BI + Continuous optimization.	Tailored solution built for your specific business challenges.

"Old ERP is dead. Intelligent,
AI-empowered SAP is the new standard — and we deliver it."

Business Intelligence (Power BI)

Real-Time, Predictive BI

Offerings:

- Real-Time Predictive Dashboards- SAP/Power BI/Tableau.

- AI-Driven Forecasting.

- Predictive analytics with ML models: "Alerts for inventory shortages 2 weeks early.

- Data Transformation & Warehousing for Scalability: Data warehousing for any business."

BI That Thinks Ahead

Key Differentiator
While others offer dashboards, we deliver foresight.

Our BI Approach
While others build dashboards, we build decision engines:

Data Integration
Unifying disparate data sources into a coherent knowledge base.

Visual Intelligence
Creating intuitive, actionable dashboards that drive decisions.

Predictive Modeling
Deploying machine learning to anticipate business trends.

Autonomous Action
Connecting insights to automated processes for immediate impact.

Technical Differentiation
Our proprietary BI methodology integrates with NeuraCore to enable autonomous data-driven actions—moving beyond passive reporting to active business optimization.

Use Case

- ☑ Developed 7 SAP module-wise dashboards for a public utility firm, reducing manual report time by 80% and enabling daily data-driven decisions.

- ☑ Developed a BI dashboard for a restaurant business, driving significant operational insights and boosting profitability.

- ☑ Engineered six advanced BI dashboards, integrated with AI, machine learning, and Power Automate, featuring 150+ KPIs for the owner of a leading business group—empowering real-time insights and fueling strategic, data-driven decision-making across the enterprise.

Your AI Employees

NeuraCore & ExecuCore: Your AI-Powered Advantage

Offerings:

NeuraCore™ Platform Self-optimizing platform for operations effciency.

Learn from organizational behavior patterns.

Adapt to changing business conditions without reprogramming.

Integrate seamlessly with existing enterprise systems Accuracy in decision-making within defined parameters.

ExecuCore™ System AI for executive-level decision autonomy (e.g., strategic forecasting, task assignment, critical business alert, vision board).
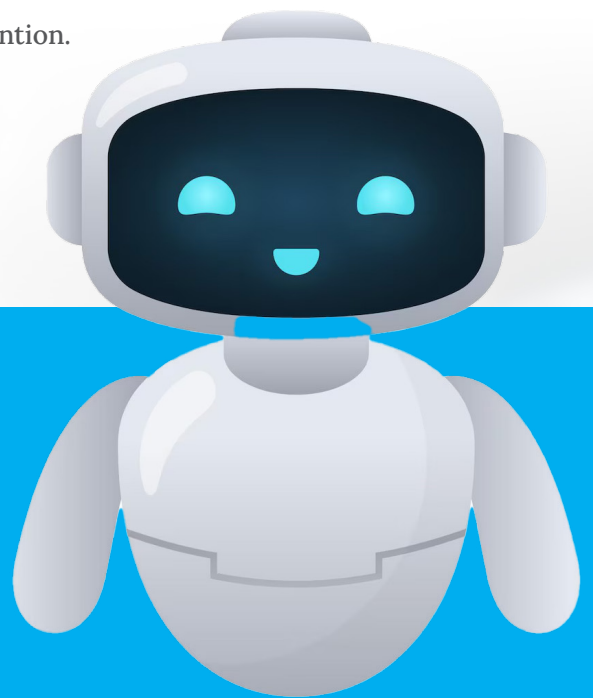

While most "AI assistants" merely suggest actions, ExecuCore takes authorized autonomous actions across integrated business systems:

- Manages end-to-end business processes without human intervention.

- Self-optimizes based on outcome metrics you define.

- Provides full audit trails and explainable decision paths.

- Integrates with all major ERP and CRM systems.

Automation Tools

- Intelligent Automation: The Engine of Hypergrowth.

- WhatsApp-enabled chatbots.

- Workflow Automation.

- RPA.

- AI-Powered Automation.

Eliminate bottlenecks. Amplify productivity. Achieve exponential growth

Software, Apps & Websites

Smart Development with Built-In Intelligence
Our Offerings

- AI-driven software tools.

- iOS/Android apps with BI components.

- NeuraCore-powered websites.

" **Intelligent digital transformation for every screen** "

Our Development Approach:
Every application we build incorporates intelligence from the ground up:

- **Business Logic Mapping**
  Deep analysis of your processes to identify automation opportunities.

- **AI-Native Architecture**
  Building applications with NeuraCore integration from day one.

- **Continuous Intelligence**
  Systems that learn and improve from every interaction.

- **Scalable Autonomy**
  Applications that grow more capable and self-sufficient over time.

Technical Differentiator: Our proprietary development methodology results in applications that require less maintenance while delivering more business value compared to traditional development approaches.

Client Success

Sports City Digital Transformation Metrics
Architected an integrated Sports City ecosystem merging ERP systems, smart devices, and AI-powered player analytics with customer-facing applications, revolutionizing both operational efficiency and fan engagement across the entire facility.

Real-Time Business Intelligence Platform
Engineered a data analytics platform delivering real-time insights on sales, customer relationships and inventory to executives, dramatically improving decision-making speed while substantially boosting revenue generation and resource optimization.

Executive Productivity Solution
Created a task delegation system streamlining workflow management across teams, saving leadership 4 hours daily in administrative oversight and enabling executives to redirect focus toward strategic initiatives with measurable business impact.

We don't just write code—we engineer intelligent business solutions.

Strategic Talent Solutions

The Right Expertise at the Right Time

In today's technology-driven economy, access to specialized talent isn't merely a staffing function — it's a strategic lever for competitive advantage. At InTime, we don't just fill positions; we embed experts who accelerate transformation, automation, strategy drive innovation, and deliver measurable business outcomes.

Specialized Expertise Areas

SAP Technical & Functional Specialists

Expertise across core modules: FI/CO, MM, SD, PP, HCM.

Advanced specialists in S/4HANA, BTP, Fiori, BODS, BW/4HANA, SAP Analytics Cloud.

SAP technical architects and ABAP developers.

Certified consultants with proven multi-industry implementation success.

Data & Analytics Professionals

Data scientists with predictive analytics and machine learning expertise.

BI specialists proficient in Power BI, Tableau, and SAP Analytics Cloud.

Data engineers and ETL specialists for complex integration architectures.

Analytics translators bridging technical insights with business decision-making.

Automation & Innovation Talent

RPA developers (certified in UiPath, Blue Prism, Automation Anywhere).

Process optimization architects to streamline workflows before automation.

Full-stack developers with embedded AI/ML capabilities.

Innovation consultants identifying high-ROI automation opportunities.

Executive & Strategic Leadership

C-Suite technology leaders (CIO, CTO, CDO, CISO).

Digital transformation directors and program managers.

Enterprise architects aligning IT vision to business strategy.

Change management experts ensuring adoption, speed, and ROI realization.

Why InTime?

Multilayer Pre-Interview Screening We ensure the right fit through rigorous multilayer interview processes before presenting any candidate, guaranteeing technical excellence and cultural alignment.

Success-Based Model

We back every placement with a performance guarantee and extended evaluation periods — ensuring you only invest in talent that creates measurable business impact.

Continuous Development

Every professional placed through InTime receives continuous mentorship and technical upskilling, ensuring their expertise evolves alongside rapidly changing technology landscapes.

"In a world where technology expertise is the ultimate competitive advantage, we ensure you're never at a talent disadvantage."

Mastering the Technology Trinity - Training & Development
From Competent to Exceptional

The modern business battlefield is defined by three critical technologies: AI for automation, SAP for operations, and BI for insights. Organizations and professionals who master this trinity will thrive—all others face rapid obsolescence.

Our Key Offerings

AI Workshop - Unlock the Power of AI

AI for Industry Leaders: Upskill, Automate & Maximise workforce potential.

Empower Your Team With AI: Industries tailored training for Peak Productivity and Seamless Automation.

BI Workshop - Be Intelligent in BI: Upskill for Growth, Insights, and Impact

Master BI Skills to Stay Relevant in a Data-Driven World: In today's business landscape, data isn't just numbers — it's power.

This workshop is designed to equip individuals and enterprises with essential Business Intelligence (BI) skills to turn data into real business insights.

SAP Workshop - From Rediness to Excellence

Pre-Implementation Rediness Program: strategic guidance to prepare your team and processes for a smooth SAP project execution.
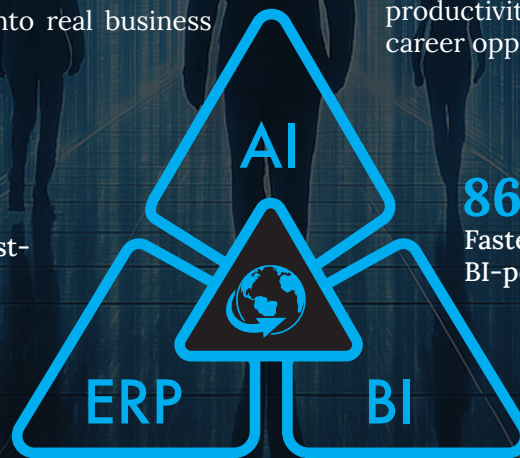

Post-Implementation Upskilling Program: Hands-on training to maximise user adoption, boost productivity and unlock the full potential of your SAP system.

Workshop - Future belongs to those who understand AI. Start today

AI for all, whether you're a student, a professional, or simply curious about the future — this training is for you. No coding? No problem. Learn the basics of AI, boost your productivity, and open new doors to better career opportunities.

47% higher ROI on technology investments through synchronized implementation.

86% Faster decision-making through BI-powered intelligent automation.

AI

ERP   BI

The InTime Advantage
Our integrated mastery of allthree domains delivers transformation that others can't match.

For Organizations

- AI won't bankrupt your company competitors using AI to slash costs and improve offerings will.

- SAP S/4HANA migration isn't optional—it's the backbone of the future-ready enterprise.

- Business Intelligence isn't just reporting—it's the decision engine that drives competitive advantage.

For Individuals

- AI won't take your job—colleagues who leverage AI effectively will replace you.

- SAP expertise must evolve beyond transactions to intelligent process orchestration.

- BI skills must advance from data visualization to predictive insights and autonomous actions.

"The future belongs to those who master the technology trinity.
Will you lead the change or be eliminated by it?"

The InTime Edge

Global Reach
Serving startups to conglomerates.

Project Turnaround
Resurrected 2 failing Big scale ERP projects in 24 months.

Full-Spectrum Mastery
One partner. All services.

World Bank Trust
Delivered 2 major public sector digital initiatives.

Elite Clients
30+ leading companies across 6 countries.

Tech Vision
We build the future, not chase it.

Achievements & Milestones

"Without intelligent automation, businesses risk falling behind. InTime ensures you stay ahead."

Foundation
Founded with a mission to democratize advanced IT capabilities.

International Projects Wins
Executed two massive government projects "30+ Titans Served: Partnered with industry giants worldwide.
